MOHAMED SADEK

Arabic Language Quality Specialist — Native Arabic · AI-Assisted Content Production & Review

Shebin El-Kom, Menoufia, Egypt | 01000025168 | mohamed_sadek07@outlook.com | github.com/nexora-01-eg | nexora-01-eg.github.io

Prepared for: Alignerr — Arabic Language Expert

SUMMARY

Native Arabic speaker who writes, reviews, and quality-checks Arabic digital content every day while running an independent web-production line: a live bilingual (Arabic/English) website, a live Arabic fashion storefront, a live Arabic ordering platform, and 13+ Arabic small-business sites. Correcting AI-generated Arabic text for naturalness, register, and cultural fit is a built-in step of the AI-assisted workflow used across all of this work. Applying this skill to AI output evaluation: assessing accuracy, idiom, register, and cultural nuance, and writing structured feedback. Works independently and asynchronously.

ARABIC LANGUAGE EVIDENCE (ALL VERIFIABLE VIA LIVE LINKS)

- **Native Arabic** — daily writing and review in Modern Standard and Egyptian Arabic for real web audiences.
- **Complete paired Arabic/English content** authored for a live bilingual website — Arabic typography (Amiri/Cairo), RTL layout with correct number/phone directionality: nexora-01-eg.github.io
- **Full Arabic copy for a live storefront** (she.shoes): product copy, UI labels, order flow, cash-on-delivery messaging — Arabic-first, RTL.
- **Live Arabic ordering platform** (AL-Diwan Coffee): storefront text and order-flow copy.
- **13+ Arabic small-business websites** (gyms, furniture, spa, halls, real estate) produced from one template core — consistent terminology and formatting across every build: github.com/nexora-01-eg/nexora-client-sites

QUALITY-REVIEW SKILLS (DIRECTLY TRANSFERABLE TO AI OUTPUT EVALUATION)

- Identifies unnatural phrasing, register mismatches, and cultural issues in Arabic web copy; corrects AI-drafted Arabic daily inside OpenCode / Claude / Cursor workflows.
- Works to written criteria and checklists; maintains a verification log covering a curated 53-template library.
- Documents findings in structured written reports with severity and next action — the same "structured, detailed feedback" pattern this role requires.

AI WORKFLOWS

- Daily AI-assisted production with OpenCode, Codex, Claude, Cursor, and Manus: prompt-driven planning, drafting, review, and iteration.
- No formal AI/ML background — as the role specifies, none is required; the requirement is deep command of Arabic.

SELECTED PROJECTS (INDEPENDENT BUILDS; LINKS VERIFIED OCTOBER 2026)

1. Bilingual website (EN/AR) — live — authored both language versions; Lighthouse Accessibility 1.0. nexora-01-eg.github.io

2. SHE — live Arabic fashion storefront — she.shoes (real domain).

3. AL-Diwan Coffee — live Arabic ordering platform — with 9 written QA/readiness documents. nexora-01-eg.github.io/al-diwan-coffee/

4. Nexora Client Sites — 13+ Arabic sites — github.com/nexora-01-eg/nexora-client-sites

EDUCATION

Faculty of Economics and Political Science — Cairo University. Expected graduation 2027.

LANGUAGES

Arabic — native · English — B1 (self-assessed)

Every claim above is backed by public, inspectable evidence (verified October 2026). No employment history is claimed; all projects are independent builds.
